## BOOK SYNOPSIS

In this unique collection, a distinguished group of social theorists reflect upon the ways in which crime and its control feature in the political and cultural landscapes of contemporary societies. The book brings together for the first time some of today's most powerful social analysts in a discussion of the meaning of crime and punishment in late-modern society. The result is a stimulating and provocative volume that will be of equal interest to specialist criminologists and those working in the fields of social and cultural studies.
